

For homemade Towers of Hanoi:

- Wall plug anchors (the orange sleeves). About 2-3/8" long. I bought them at Empire Building Supply, Santa Fe. Like <http://wedo.hillmangroup.com/item/solid-wall-anchors/wallplug-anchor/370748>
- Wood: 3.5" wide, .75" thick, clean high quality wood (no nicks and damage in general). I think it came in 8 ft lengths. Each piece cut to 6". Sanded corners and edges.
- I used a table saw and an orbital sander.
- Nails without heads, just less than 3" long.
- Up to five washers of different sizes, my largest are about 2" and the smallest 1.25"
- 1", 3", 5" nail positions from the end
